Engineered Veneer

A VENEER THAT COMBINES DESIGN, EXOTICISM, ORIGINALITY, AND CONSTANCY

## THE NATURE, ONE STEP FURTHER...

Cedan proposes a step in the future with its **Evolution HD** engineered wood veneer complete program. The manufacturing process that is used permits to push a little further natural wood veneer attributes by giving them a uniformed aspect from sheet to sheet. Manufactured in order to obtain High Definition grains and designs, the program offers you the possibility to realise multiple projects without worrying about the appearance variations. **Evolution HD** program's classic and warm designs, as well as the more creative or exotic ones will stimulate your creativity.

Code :

■ = Available in 4' x 8' format

■ ■ = Available in 4' x 10' or 4' x 11' format (depending on type of backer or panel used)

Note: We recommend using actual samples in order to get a more realistic definition. All pictures have been taken from raw material, without any finishing or stain.

## CUTS

### FLAT CUT (FC)

It offers a combination of cathedral structures along with straight grain. The flat cut effect gives a natural look to our **Evolution HD** product line, akin to the appearance of planks commonly used in woodworking. The number of cathedrals, their position and sizes vary according to the selected product.

### QUARTER CUT (QC)

The quarter cut is a special slicing method that creates a linear and contemporary look. For the same species, the widths, colour layouts and visuals of **Evolution HD** allows different patterns for giving free rein to your creativity.

### OTHER CUTS

To reveal a particular feature of wood, other cuts are available. Unlike natural species, **Evolution HD** creates a much more pleasant, harmonious and uniform look. Imagine a bird's eye maple uniformly spread across a sheet or think about the beauty of a burl without having to resort to a mechanical arrangement.

## WHAT YOU NEED TO KNOW ABOUT EVOLUTION HD WOOD VENEER FABRICATION

Evolution HD wood veneer fabrication process consists in treating neutral appearance wood species (presenting few inherent characteristics) which are abundantly available and give them characteristics of rare wood species that are hard to get. With this process, not only do we protect our natural resource and some exotic species that are considered in danger, we can also create designs without limits.

Evolution HD wood veneer fabrication process provides:

- High definition: Uniformed designs and colors, well defined from one sheet to the other
- Availability of assorted replacement or additional merchandise even after several months
- Use of a raw material without causing damage to the environment
- Inspiring designs and colors which are continuously available

### LAMINATED PANELS

Evolution HD wood veneers are offered on different panel types such as particle board, MDF, HDF and plywood.

Available sizes: 4' x 8', 4' x 10', 8' x 4', and 10' x 4'  
Available finishes: unsanded (rough), pre-sanded, varnished

### TENDERIZED VENEER SHEETS

Evolution HD tenderized veneers sheets are available in a large variety of backers.

Available backers types: 10 mil and 20 mil paper, wood (2-ply) and semi-rigid (PB Brown, PB Beige and High Pressure Laminate)

Available sizes: 48" x 96", 48" x 120", 96" x 48", and 120" x 48"

Available finishes: Unsanded, pre-sanded, varnished

### WOOD WEAVE VENEER SHEETS

Evolution HD wood weave veneer is the best choice for high-end quality design projects. Create your own design by choosing either one or multiple veneer species. Be creative!

Available size: 44" x 94"

Available pattern sizes: 2" x 2" or 2" x 1"

### EDGE BANDING

Evolution HD program presents edgebanding in a large range of thicknesses.

Available thicknesses: 0.6 mm, 1 mm, 1,5 mm, 2 mm, and 3 mm, long grain and short grain

Available widths: from 5/8" to 11"

### RAW VENEERS

Evolution HD raw veneers (no backer) are also available for customers who have the possibility to press their own components.

Available sizes: 26" x 99", 26" x 135", 50" x 99", and 50" x 135"
